GlobalMart · Returns Fraud Investigation Dashboard

Source: `globalmart.gold.flagged_return_customers` — scored by the UC2 Returns Fraud Investigator notebook
Audience: Returns operations manager, fraud team, finance
Refresh: Re-run `UC2_Returns_Fraud_Investigator` to update all numbers

EXTREME (≥80) — triggered 6 rules simultaneously. Investigate today.

HIGH (65–79) — triggered 5 rules. Investigate within 24 hours.

MODERATE (50–64) — triggered 4 rules. Review this week.

BORDERLINE (40–49) — triggered 2–3 rules. Monitor and soft verify.

Section 1 — Summary KPIs

Five numbers that summarise the fraud picture. 39 customers flagged across all regions. Score range is 40–80 (rules sum to 100; max 6 rules = 80 pts). Investigate EXTREME and HIGH cases first.

Investigation Protocol

Prioritize Red: Begin with the EXTREME cases. These triggered all 6 fraud rules and require immediate lockdown.

Verify Briefs: Access the AI Briefs to review evidence logs and quality validation notes.

Audit Refunds: Analyze the $$$ amount in inflation to identify the specific products or categories being targeted for over-refunding.

SLA: High-score cases must be moved to "Under Review" within 24 hours.

Total Customers Flagged
Customers who scored 40+ out of 100.

39

HIGH Cases (Score 65–79)
Triggered 5 rules. Strong fraud signal. Investigate within 24 hours.

11

EXTREME Cases (Score ≥80)
Triggered 6 rules simultaneously. Highest possible score. Investigate today.

0

AI Briefs Ready
Investigation briefs that passed quality validation.

39

Total Refund Exposure ($)
Maximum financial loss if all cases are confirmed fraud.

53.05K

Total Refund Inflation ($)
Money refunded ABOVE what products were worth. Already paid out.

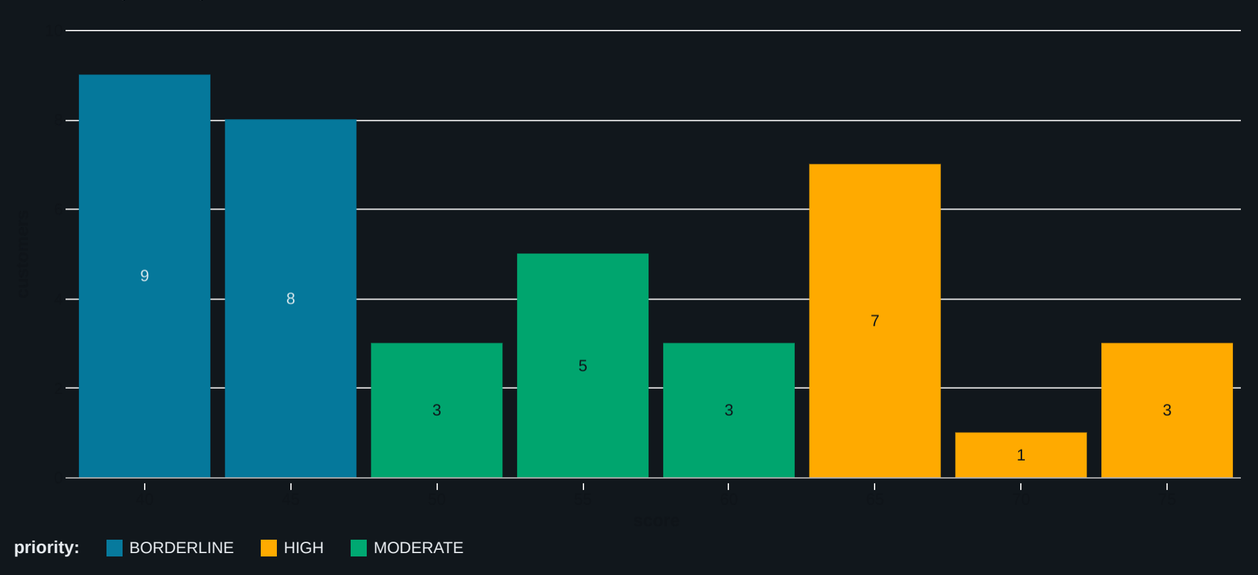
27.85K

Section 2 — Score Distribution & Rule Analysis

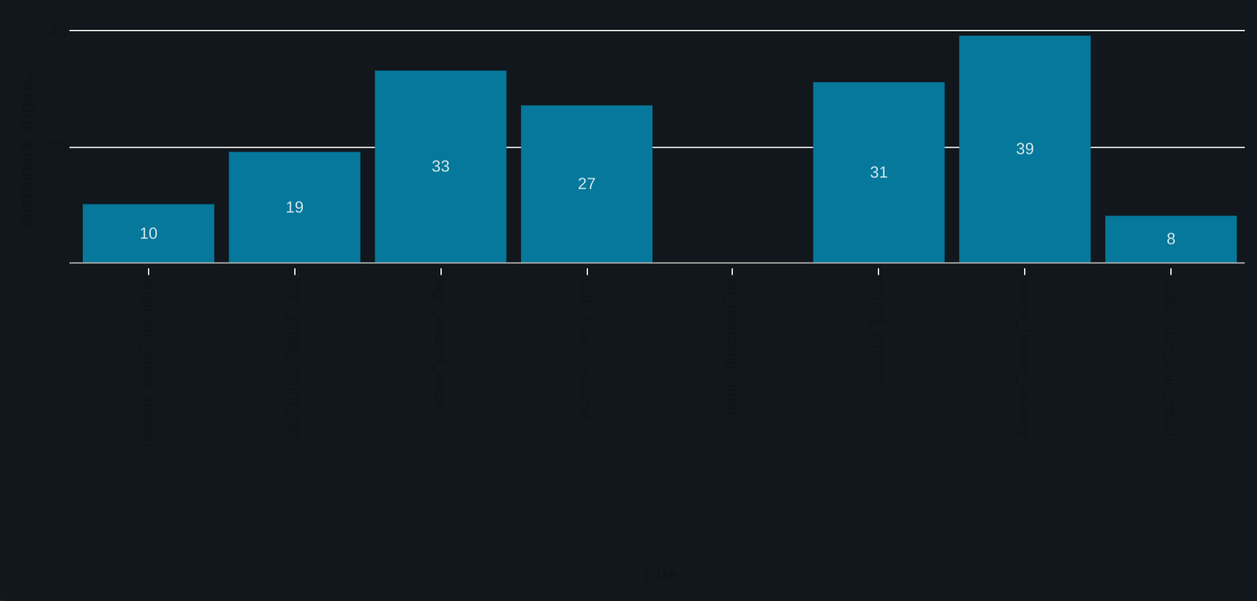
Left: Customers by anomaly score. Score range is 40–80. Color shows priority tier. 17 BORDERLINE, 13 MODERATE, 6 HIGH, 3 EXTREME.

Right: How many of the 39 flagged customers triggered each rule. `return_before_delivery` fires most often (38/39 = 97%). `no_matching_order` is now weighted 15 pts — highest-signal rule after volume and inflation.

Customers by Anomaly Score



How Often Each Fraud Rule Was Triggered



Section 3 — Segment & Region Breakdown

Segment: Corporate leads with 19 flagged customers, Consumer 16, Home Office 4. Corporate concentration may reflect account-level policy abuse behind large order volumes.

Region: West leads with 17 flagged customers. Region values corrected from abbreviated codes (W→West, S→South).

Section 5 — Full Investigation Queue

All 39 flagged customers sorted by anomaly score. The **investigation_brief** column contains the AI-generated 3–4 sentence summary ready to use before contacting a customer.

Score (40–80) | **Priority** (EXTREME / HIGH / MODERATE / BORDERLINE) | **return_rate_pct** (always 0–100%) | **refund_inflation** (excess paid above product value) | **return_before_delivery_count** | **no_matching_order_count** (phantom returns — strongest signal)
